

LUCAS VIEIRA SOUZA

FullStack Developer

I am a full-cycle programmer and have experience that spans infrastructure, computer networks and development. On the front-end I create dynamic interfaces, working with screens, routes, components and other essential aspects of web development. On the back-end I have knowledge in creating and maintaining APIs, using Swagger to ensure documentation and integrity. Additionally, I manipulate databases, ensuring data efficiency and security. I am always up to date with the latest technologies and market trends, which allows me to bring innovation and efficiency to the projects I work on.

Experience

CNA Idiomas

Freelancer

Jan 2022 - Dec 2023

I served as a technician specializing in computer maintenance, troubleshooting hardware issues, formatting, and installations. My role involved providing comprehensive support for computer systems, ensuring optimal performance and resolving technical challenges efficiently.

Apta Sistemas

Full-cycle Intern

March 2024 - Present

I was deeply involved in Full-stack development, handling both front-end (Angular) and back-end (C#) tasks, alongside infrastructure and SQL Server database management. Notably, I contributed to projects such as Slock (an energy source blocking system) and Metronic (a UI development tool). My role encompassed diverse responsibilities across development and infrastructure, ensuring successful project execution and deployment.
